Career Objective

Computer Engineering undergraduate with hands-on experience in Java, Python, React.js, Node.js, and MongoDB through internships and full-stack projects. Strong in problem-solving, data structures, and backend development, and eager to contribute as a Software or Full Stack Developer.

Education

B.Tech – Computer Engineering (IoT & CSBT) Pursuing
ADCET, Ashta *CGPA: 8.7 / 10*

Diploma – Computer Engineering 2024
Government Polytechnic Miraj *CGPA: 8.7 / 10*

Skills

Languages: C++, Java, Python

Web Development: HTML, CSS, JavaScript, React.js, Node.js, Express.js, Next.js

Databases: MySQL, MongoDB

CS Fundamentals: Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks

Machine Learning: NLP, Generative AI, ML Libraries

Tools: Git, GitHub, LeetCode

Experience

Machine Learning Intern, ADCET Ashta Jun 2025 – Jul 2025

- Completed ML internship in Python with hands-on model development and experimentation.
- Worked on data preprocessing, feature engineering, and core ML algorithms.
- Achieved an outstanding performance score of 96.34/100.

Python Intern, iNSYS Software Development and Training Center Jun 2023 – Aug 2023

- Developed Python programs using NumPy and Pandas for data preprocessing tasks.
- Implemented classification algorithms and assisted with model training and evaluation.

Projects

Nalini Website — *Next.js, CSS, JavaScript* **Live Demo**

- Developed a responsive business website to showcase jaggery products and company info.
- Built SEO-friendly pages and optimized site performance for faster load times.
- Designed a clean, mobile-friendly UI using Next.js and modern web practices.

Wanderlust (Airbnb Clone) — *Node.js, Express.js, MongoDB, EJS* **Live Demo**

- Built a full-stack booking platform with auth, listings, and role-based access control.
- Implemented CRUD operations, Cloudinary image uploads, and Passport.js session auth.
- Deployed on Render using MongoDB Atlas and `connect-mongo` for session storage.

Resume Screening System — *Python, NLP, Machine Learning*

- Built a resume screening app that analyzes resumes vs. job descriptions using NLP.
- Applied text preprocessing, TF-IDF vectorization, and similarity scoring for ranking.
- Built a recruiter interface to upload resumes and generate candidate match scores.

Certifications

Oracle University 2025
Oracle AI Foundations, Generative AI

MongoDB University 2025
CRUD, Aggregation, Indexing
